

# RAVEENA SHARMA

## Computer Science Engineer | Cybersecurity & Software Development

Pune, Maharashtra, India | +91 8888953921 | raveenasharma3921@gmail.com  
linkedin.com/in/raveena-sharma-csit | github.com/RS3921

### PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science (Cyber Security) student with a 9.0 CGPA, combining hands-on software development with applied cybersecurity across networks, web applications, cryptography and cloud. Built and shipped projects spanning distributed storage security, data loss prevention, ML-driven risk analytics and full-stack web development. Led a 6-project research portfolio as R&D Lead, and ranked in the top 10% globally on TryHackMe. Comfortable across the stack — writing code, securing it, and documenting it clearly for both technical and non-technical audiences.

### CORE SKILLS

**Programming & Development:** Python, C, C++, JavaScript, HTML/CSS, REST APIs, MongoDB, Git/GitHub, Web Development

**Cybersecurity:** Vulnerability Assessment & Penetration Testing (VAPT), Ethical Hacking, Network Security, Cryptography, Digital Forensics, Data Loss Prevention (DLP), SIEM, Risk Assessment, GRC Fundamentals

**Cloud & Tools:** Google Cloud Platform (GCP), Splunk, Nessus, Nmap, Wireshark, Burp Suite, OWASP ZAP, Metasploit, John the Ripper, Hashcat, Hydra, Autopsy, FTK Imager, VirusTotal, Kali Linux

**Standards & Regulations:** GDPR, PCI-DSS, HIPAA, DPDP Act, OWASP Top 10, Zero Trust, Secure SDLC

**Soft Skills:** Technical Writing, Cross-team Communication, Team Leadership, Mentoring, Problem Solving, Attention to Detail

### EXPERIENCE

**Research & Development Lead** | OffSecDiary Jan 2026 – Jul 2026

- Led a portfolio of 6 security research projects over 7 months, directing a team of researchers while personally driving one project end to end.
- Reviewed technical findings and write-ups for accuracy and consistency before publication.
- Coordinated vulnerability analysis, research documentation and knowledge-sharing content across the team.

**Web Developer** | BloggersCon Vision Jun 2025 – Jul 2025

- Developed and maintained web pages and features using HTML, CSS and JavaScript for the organization's public-facing website.

**AI Intern** | Corizo Oct 2024 – Dec 2024

- Completed a structured AI/ML internship, applying foundational concepts to projects relevant to anomaly and threat detection.

**Cloud Computing Intern** | Yhills Jun 2024 – Jul 2024

- Gained hands-on exposure to cloud computing fundamentals, deployment models and core cloud services.

### PROJECTS

**Sovereign On-Premise Agentic AI Workbench** | Smart India Hackathon 2026, MRPL

- Building an air-gapped, self-hosted AI workbench that lets industrial organizations run agentic AI on confidential data with zero external network calls, following zero-trust principles.
- Designing a multi-model backend that auto-selects the right open-weight LLM per task, with local tool use, multi-step planning and OCR/vision for scanned documents.

**SAT-SA: Supervisory Analytics Tool** | Final-Year Major Project | Smart India Hackathon Problem Statement |

github.com/mav3r1ck26/SAT-SA

- Designed an offline, explainable analytics platform to assess case-management and process data across Critical Sector Entities, identifying execution gaps and coverage blind spots.
- Built a hybrid rule-based and ML pipeline that generates entity-level risk scores and prioritizes samples for expert review.
- Reviewed 14+ research papers to define an air-gapped architecture suited to high-sensitivity environments.

**AI-Driven Pre-Transaction Fraud Risk Warning System for UPI** | Final-year team project, guided by Dr. Rudresh Shirwaikar

- Reviewed 15 research papers on ML, graph neural network, NLP/BERT and deep learning approaches to financial fraud detection.
- Designing a system that analyzes payment messages, URLs, QR codes and transaction features to give an explainable Safe / Suspicious / High-Risk warning before payment.
- Addressing class imbalance, evolving fraud patterns and end-user explainability as core design constraints.

**Data Loss Prevention (DLP) System** | github.com/RS3921/DLP-Project

- Designed an enterprise DLP prototype with a Windows endpoint agent, admin dashboard and Active Directory-ready policy mapping for centralized control.
- Implemented per-device agent tokens and real-time activity monitoring to detect and flag unauthorized data movement.

- Built an ML-based malicious behavior detection module to reduce false positives in anomalous-activity alerts.

**Symbiotic Chunk Storage (SCS): Secure Distributed Storage** | [github.com/RS3921/Symbiotic-Chunk-Storage](https://github.com/RS3921/Symbiotic-Chunk-Storage)

- Engineered a distributed storage system using AES-256-GCM encryption and Reed-Solomon erasure coding for data confidentiality and fault tolerance.
- Implemented Merkle proofs and cross-chain anchoring for tamper-evident integrity verification.
- Built autonomous healing and crypto-shredding mechanisms supporting GDPR/HIPAA-aligned data lifecycle and deletion requirements.

**Unified Operations Center: Employee Management System** | [github.com/RS3921/Employee-Management-System](https://github.com/RS3921/Employee-Management-System)

- Contributed to a team-built platform with MongoDB-backed storage and role-based user management.
- Built calendar and event-tracking modules plus performance analytics for organizational reporting.

## EDUCATION

**B.Tech, CS & IT (Cyber Security)** | Symbiosis Skills and Professional University, Kiwale, Pune 2023 – 2027

- Overall CGPA: 9.0/10 (First Year 8.76, Second Year 9.06, Third Year 9.21)

**HSC (Higher Secondary)** | S.B. Patil College of Science and Commerce, Ravet, Pune 2021 – 2023

**CBSE (Secondary Education)** | Podar International School, Chinchwad, Pune 2008 – 2021

## CERTIFICATIONS

- Cybersecurity Career Starter Certification (CCSC)
- Introduction to Cloud Security, Simplilearn
- Google Cloud Study Jams 2025: 19 Official Skill Badges and Gen AI Arcade Certification
- Cisco Ethical Hacker (In Progress)
- The Complete Ethical Hacking Course: Beginner to Advanced, Udemy
- Python Mega Course: Learn Python in 60 Days, Build 20 Apps, Udemy
- Data Structures and Algorithms, AllCSNotes
- TryHackMe: Top 10% global rank, including the Jr Penetration Tester path; PreSecurity and Cyber Security 101 completed

## LEADERSHIP & ACHIEVEMENTS

- Cloud Security & Innovation Lead, AWS Student Builder Club, SSPU Core Team (2026–27): leading cloud-security projects, workshops and hands-on initiatives.
- Senior Management Head, 0x0 PIR4T3S Club (Oct 2025 – Apr 2026): led operations and event planning for a cybersecurity student community, coordinating CTFs and workshops.
- Internship Coordinator (First, Third and Final Year) and Smart India Hackathon Internal Coordinator (2025, 2026).
- Class Representative (First Year); Volunteer, HICA SSPU Team, including hosting a Low-Code/No-Code (LCNC) session (Second Year).
- Session Anchor for SSPU conferences and events; coordinated a coding competition.
- Participant: Cyber Security Quiz, JSPM Hackathon, Mini Hackathon, Poster-Making Competition.
- X'PLOITATHON CTF 2026: qualified for Round 2 (Round 1 rank 11/175; Round 2 rank 22/50). Bypass CTF: ranked 20th. MumbaiHacks: qualified for Round 2.
